PROFESSIONAL SUMMARY

Fresher Computer Science graduate (B.Tech, AI & Data Science) with hands-on experience building backend applications using Java, Spring Boot, and RESTful APIs across four independent projects, including an AI-powered RAG application using OpenAI embeddings and Pinecone. Strong foundation in database design (MySQL), API development, and secure authentication. Quick learner with a track record of independently designing, building, and deploying full-stack solutions end to end.

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML, CSS, SQL

Frameworks & Architecture: Spring Boot, Microservices Architecture, RESTful Web Services

Databases: MySQL

AI/ML Tools: OpenAI Embeddings, Retrieval-Augmented Generation (RAG), Pinecone Vector Search, Python (ML basics)

Tools & Platforms: Git, GitHub, Eclipse, IntelliJ IDEA, Visual Studio Code, Postman, Splunk

PROJECTS

CampusAI – AI-Powered Study Assistant | Java, Spring Boot, RAG, OpenAI, Pinecone

Nov 2025

- Built a Spring Boot backend enabling students to upload PDF lecture notes and receive AI-generated answers, summaries, and quizzes.
- Implemented Retrieval-Augmented Generation (RAG) using OpenAI embeddings and Pinecone vector search to ground responses strictly in uploaded study material, improving answer relevance and reducing hallucinated content.
- Designed REST APIs to handle document ingestion, query processing, and response generation.

Real-Time Pulmonary Monitoring System | Python, IoT, Machine Learning

Mar 2026

- Developed an IoT-integrated monitoring system to track respiratory conditions (asthma, COPD, pneumonia) using ML models trained on patient vitals data.
- Built real-time alerting logic for early emergency detection, supporting remote patient care use cases.

Visitors Database Management System | Java, Spring Boot, MySQL

Jul 2025

- Designed and implemented a full-stack visitor management application with secure authentication and role-based access.
- Built MySQL schema and backend logic for visitor data storage, retrieval, and automated report generation.

Medi Remind – Medication Reminder System | Java, Spring Boot, MySQL, HTML, CSS

Aug 2024

- Built a full-stack web application to automate SMS medication reminders based on user-defined schedules.
- Implemented user registration, scheduling automation, and a responsive web interface end to end.

EDUCATION

B.Tech, Artificial Intelligence and Data Science

KGiSL Institute of Technology, Coimbatore | Nov 2022 – Mar 2026

CGPA: 7.3 / 10
